LABOR DESCRIPTION**SENIOR LOGISTICS ANALYST**

Education: Requires a Bachelor degree from an accredited college or university.

Experience & Responsibilities: Requires a minimum of fifteen (15) years of professional experience in Integrated Logistics Support (ILS) with specialized experience for at least four (4) of these years. Specialized experience must include three (3) or more of the following: evaluating metrics, modeling, assessing logistics studies, developing plans, conducting research, defining technical objectives, developing program schedules and milestones, and producing quality products related to logistics support analysis, configuration management, resource analysis and life cycle cost analysis.

Senior Analyst

Education: Requires a minimum of a Bachelor degree from an accredited college or university in engineering or related disciplines, such as physics or mathematics, or other related scientific or technical discipline or the equivalent experience, i.e., any combination of undergraduate/graduate study/experience where two (2) years of experience in the required areas equals one (1) year of academic proficiency, and each year of graduate study equals one (1) year of relevant experience.

Experience & Responsibilities: Requires ten (10) years of engineering related work experience, or which six (6) years must include specific experience in engineering disciplines or logistic for DOD weapon systems and equipment, experience in management and supervision; experience in acquisition and life-cycle support, experience in integrated data environment and experience in the management and development of DOD technical manual applications. Must have experience in:

- (1) Planning, controlling, and directing technical, engineering, or logistics programs for DOD weapon systems, equipment or information technology programs.
- (2) Performing independent work required to provide logistics and support system effectiveness analyses.
- (3) Managing and supervising subordinates.
- (4) Developing technical information specifications and standards by providing review, analysis, conversion, and update of all Technical Manual Specifications and Standards (TMSS) documents.
- (5) Using DOD and Navy regulations and specifications and standards for technical manual information, Integrated Logistics Support, and ILS procedures.
- (6) Managing the translation of system logic flow charts and other data mapping requirements.
- (7) Using the Standard Generalized Markup Language (SGML) and other similar languages.
- (8) Participating in the development of test strategies, devices, and systems.
- (9) Researching problems discovered by Quality Assurance or product support, and developing solutions to the problems.
- (10) Planning, and evaluating information technology system engineering, development, test and evaluation. This involves evaluating test plans and procedures, assessments of program risks and benefits, and evaluation of related configuration problems as it applies to production and product improvement.

TECHNICAL WRITER

Education: Requires a Bachelor degree in an associated discipline from an accredited college or university as required for this position, or the equivalent experience, i.e., any combination of undergraduate/graduate study/experience where two (2) years' experience in the required area equals one (1) year of academic proficiency, and each year of graduate study equals one (1) year of relevant experience.

Experience & Responsibilities: Requires a minimum of two (2) to four (4) years related work experience providing technical writing and documentation support to technical and management level personnel. Must have experience in:

- (1) Documenting, planning, support and writing for project, presentation, and proposal Related work, usually of a highly technical content.
- (2) Supporting the engineering, management, and administrative staff in organizing, Assembling, and writing technical proposals, presentations, and related materials.
- (3) Providing support in one or more commercially available word processing and/or desktop Publishing software programs.

TECH DATA SR. EXPERT

Education: Requires a Bachelor degree in an associated discipline from an accredited college or University as required for this position

Experience: 20 years' experience with ships technical data and training (i.e. school house, dock side and just-in time) requirements and needs

Responsibilities: Performs analysis of document structures and recommends XML tagging strategies. Responsible for ensuring accuracy of technical content and proper sequencing of content within a technical manual. Conducts investigations and troubleshooting into issues surrounding the display/publication of authoritative source material.
